EXPERIENCE

Cyabra

August 2025 - December 2025

Fullstack Engineer Intern

Tel Aviv, Israel

- Built a profile analytics dashboard in Next.js within a SaaS environment, rendering data across millions of accounts to support rich user experiences on desktop and mobile.
- Engineered a client-facing CSV upload pipeline with backend API integration capable of processing 1,000+ profiles per upload, including validation and error handling.
- Developed an advanced search and filtering feature enabling clients to sort and pinpoint relevant accounts across millions of profiles, improving cross-functional usability.
- Resolved critical frontend bugs across the web application, protecting 10+ high-value client relationships from churn.

Rewire Group

November 2023 - July 2025

Fullstack Engineer Intern

Albany, NY

- Overhauled a legacy codebase spanning hundreds of files within a fullstack web application, modularizing structure, eliminating duplication, and improving maintainability and developer onboarding.
- Developed and debugged frontend features across multiple product areas, owning end-to-end UI delivery in a collaborative, cross-functional team environment.

Pongspace

July 2022 - August 2022

Website Manager Intern

Brooklyn, NY

- Maintained and audited thousands of venue records within a web platform, ensuring data accuracy and consistency across the application.
- Built JavaScript automation scripts to streamline data entry processing, reducing manual input time and improving operational efficiency.

PROJECTS

Tandem - React Native, Expo, TypeScript, Firebase

- Developed a cross-platform React Native mobile app supporting rider and driver accounts, real-time chat, ride requests, and ride history across desktop and mobile experiences.
- Implemented API-driven authentication, user profiles, ratings, and location-based ride matching backed by Firebase.

SnakeAI - Python, Pygame

- Built a Python-based autonomous agent using Q-learning with reward shaping and state-based decision making.
- Integrated PyGame visualization, headless training, A* pathfinding guidance, and persistent Q-table saves for repeatable experiments.

SKILLS

Languages: TypeScript, JavaScript, Java, Python, HTML, CSS

Frontend: React, React Native, Redux, Tailwind CSS, Next.js

Backend: Node.js, Firebase, REST APIs

Databases: PostgreSQL, MongoDB, Firestore

Tools: Git, GitHub, Azure DevOps, Bitbucket

EDUCATION

University at Albany, State University of New York

Spring 2026

Bachelor of Science, Computer Science

LEADERSHIP

Creative CoExistence

February 2022 - May 2023

President

- Organized events and fundraising initiatives to combat antisemitism, raising hundreds of dollars.
